

1. Freeze / preflight

Exact inputs; protected read-only baselines

2. Boot / capture

Exclusive UART;
bounded diagnostics

3. Recover

Declared watchdog /
RTC route to Jumpdrive

4. Fresh readback

Immutable hashes;
filesystem and media checks

5. Owner acceptance

Visible hand use;
independent result

6. Record boundary

Accepted scope and
retained failures

A failure returns to diagnosis and a newly frozen trial.
